

Website Structure

PAGES & CONTENT OVERVIEW

Technology & Architecture

1. Frontend Architecture

- Next.js — Modern Full-Stack React Framework
- React — Component-Based UI Architecture
- TypeScript — Strongly Typed Development
- Server-Side Rendering (SSR) — Optimized server-rendered content
- Static Generation — Fast delivery for static pages
- Responsive & Mobile-First Design — Optimized across all screen sizes

2. Backend & Application Infrastructure

- Node.js Runtime — Backend application runtime
- TypeScript — Primary development language
- Payload Backend Framework — Structured backend and administration infrastructure
- REST / Server APIs — Communication layer between the website and backend services
- Server-Side Logic — Secure execution of application operations
- Data Validation — Reliable validation before processing and storage
- Authentication & Authorization — Secure access and permission management
- Media Management — Images, files, and video management
- Email & Contact Services — Contact forms and communication processing

Administration Infrastructure

A structured administration environment for managing:

Website Pages
Blog Posts
YouTube Videos
Images & Media
Clinic Information
Contact Messages
Users & Permissions

Technology & Architecture

3. Database Architecture - PostgreSQL DB

A reliable relational database designed to provide:

- Structured Data Models
- Relational Data Management
- Data Integrity
- Scalable Storage
- Secure Data Access

4. Server & Deployment Infrastructure

- Linux Server — Production server environment
- Nginx — Web Server & Reverse Proxy
- Node.js Application Server — Backend application execution
- PM2 — Process Management & Application Monitoring
- SSL / HTTPS — Secure encrypted communication
- Production Deployment Architecture — Structured deployment and application management

5. Security

- Authentication
- Authorization & Role-Based Permissions
- Server-Side Validation
- Secure API Operations
- HTTPS / SSL
- Protected Environment Configuration
- Controlled Data Access

Technology & Architecture

7. SEO & Search Visibility

- Technical SEO
- Dynamic Metadata
- Open Graph & Social Sharing
- Semantic HTML
- XML Sitemap
- Robots Configuration
- Optimized Page Structure
- Search-Friendly Content Architecture

Built with performance and search visibility in mind.
